Commercial Download Guide

WESTERN NATIONAL
INSURANCE

The relationship company®

CONTENTS

OVERVIEW

Download is an automated process that allows Western National policy information to download directly into an agency's agency management system. This process ensures you have access to the latest policy details, reduces E&O exposure, and helps improve efficiency by eliminating the need for manual entry of policy information.

Transaction types available for commercial download:

The following transaction types are supported:

- Cancellation Confirmation (XLC)
- Data Base Synchronization (SYN)
- New Business (NBS)
- Non-Renewal (RWX)
- Policy Change (PCH)
- Premium Audit (PAB)
- Reinstatement (REI)
- Re-write (REW)
- Renewal Image (RWL)

Agency management systems available for commercial download:

XANATEK	Commercial Auto

GETTING STARTED

How do I activate policy download with Western National?

The first step is to complete an Application for Download Services and submit it to Western National. This will ensure we have the information we need to set your agency up as a trading partner. You can submit the application by clicking the "Submit" button on the bottom of the application or by emailing it to agencyadmin@wnins.com.

Once I've submitted my download application, what are my next steps?

After you've submitted your download application to Western National, your next step is to contact your agency management system vendor. You will need to provide your vendor with the following information:

NAIC Company Codes:	15377 (Western National Mutual)
	24465 (Western National Assurance)
	40312 (Pioneer Specialty Insurance)
IVANS Account Number:	WNMI
IVANS ID Number (Commercial Lines):	WNMI056
Origination Number:	IBM612921WES

In addition, you will need to enter Western National's unique codes into your agency management system. These codes, which differ from the codes mapped by IVANS, are listed in this guide. Please see the Contents page to find the codes for each line of commercial business.

CONTACTS

If you have questions about setting up or receiving download, please contact your agency management system vendor. If you have questions about the data related to download, please contact:

Western National's Download Support Team

Phone: (952) 921-9281 or (800) 862-6070 Ext. 7281 | **Email: download@wnins.com**

FREQUENTLY ASKED QUESTIONS

Where do I find my IBM address?
Please contact the security administrator at your agency for this information. If you have an established IVANS account, it can also be found within your agency profile.

If my agency doesn't have an IVANS account, how can I set one up for download?
Please have the security administrator at your agency contact your agency management system vendor to set up an IVANS account. Your vendor can assist you in obtaining an IVANS User ID and Y Account, as well as establish Western National as your trading partner.

Once I activate download, what is the date range of policy information that will be available?
Download will include policy information from your activation date going forward.

What is the timing of downloads?
Download runs daily, beginning at 6:00 a.m. CT.

If I know my agency management system will not match Western National's downloaded policy numbers, should I fix my agency management system or just match the policy numbers daily as they're downloaded?
The best practice is to make corrections as soon as you can to your agency management system. The best way to eliminate unmatched policies is to correctly map the policy number. Western National's policy numbers are 11 characters, consisting of three alphabetic characters, a space, and then seven numbers.

For example:

W	C	V		1	0	2	2	8	3	1
C	P	P		1	0	2	7	5	0	4
U	M	B		1	2	3	4	5	6	7
B	O	P		7	6	5	4	3	2	1

How can I redownload a policy transaction?
You can redownload the most recent policy transaction using Western National's redownload button available in the "View Policies" area of *AgentsOnline*. The button is under the "Policy Transactions" section on the "Policy Summary" page. Once you click the redownload button, the most recent policy transaction will be included in your next download process. If you have any additional questions, please contact our Download Support Team by phone at **(952) 921-9281** or **(800) 862-6070 Ext. 7281** or by email at **download@wnins.com**.

How does '??' work with download?
When question marks ('??') are sent from IVANS, data is not overwritten in an agency management system. Fields with question marks indicate fields not mapped for policy download.

Where do I enter Western National's unique codes in my agency management system? How do I verify if they are already entered?
Depending on your agency management system, the unique code list is managed by the security administrator at your agency or your agency management system vendor. We recommend that you contact your agency management system vendor to learn more about how to add and verify the list of company unique codes.

Do I need to submit an application for download if I'm already downloading personal lines policy or commission information?

Yes, if you have not previously downloaded commercial lines policy information from Western National, you will need to submit a new application. If you are currently downloading commercial lines policy information from Western National, you do not need to resubmit an application for each line of commercial business; just email agencyadmin@wnins.com to request download for additional lines of commercial business as they become available.

My agency is downloading Commercial Auto policy information with Western National. Where do I find my Garage policy information?

Garage policy information is available under the Commercial Auto insurance line as coverages.

When Commercial Auto policies are renewed, are the vehicles renumbered or do they keep the same numbers?

Western National will not automatically renumber vehicles unless specifically requested by an agency. If vehicles are added/deleted to a policy, the vehicles will not be re-sequenced (e.g., if vehicle number 5 is deleted from the policy, vehicle number 6 will not be renumbered; it will remain vehicle number 6). However, vehicles will be **grouped together in state order** according to the state in which the vehicle is licensed (e.g., all Minnesota vehicles will be listed together). **Please note this may result in the re-sequencing of vehicle numbers in your agency management system if they are not already grouped by state.**

When Commercial Package and/or Businessowners policies are renewed, are the locations and buildings renumbered or do they keep the same numbers?

Western National will not automatically renumber locations and buildings unless specifically requested by an agency. If locations and buildings are added to or deleted from a policy, they will not be re-sequenced (e.g., if location/building number 5 is deleted from the policy, location/building number 6 will not be renumbered; it will remain number 6). However, locations and buildings will be grouped together in state order according to the state where they are located (e.g., all Minnesota locations and buildings will be listed together). Please note this may result in the re-sequencing of location and building numbers in your agency management system if they are not already grouped by state.

I'm having trouble with download. Who should I contact for support?

If you have questions about setting up or receiving download, please contact your agency management system vendor. If you have questions about the data related to download, please contact Western National's Download Support Team by phone at **(952) 921-9281** or **(800) 862-6070 Ext. 728**1 or by email at download@wnins.com.
